15. NORMALIZATION:

i. About Normalization

Normalization means adjusting values measured on different scales to a notionally commonscale

ii. Need for Normalization in Exam

Exam pertaining for a particular post could be spread across multiple shifts which will have different question paper for each shift. The normalization is to be done by considering the difficulty level of each set, since the questions may be different in different sets and difficulty level of a particular set may be different from other sets.

Hence the normalization of scores needs to be carried out for all the candidates who had written the exam, across shifts for the same post/course.

iii. Normalization Method

The following data values to be calculated for every shift for all the candidates who have appeared in the exam for the same post:

S2	Is the SD of the shift with the Highest Average Score taken as Base for normalization (Criteria for choosing the base for normalization is generally taken as the shift with 'Highest Average' of raw scores)
S1	Standard Deviation for the corresponding shift (to be scaled to S2)
X	Raw score of a candidate
Xav	Simple average of the Shift
Yav	Average corresponding to shift with highest Average (taken as Base for normalization)

Normalized Score for each candidate (Xn) = $Xn = (S2 / S1) * (X - Xav) + Yav$

Criteria for choosing the base for normalization is generally taken as the shift with 'Highest Average' of raw scores. Only exception is made if this shift (with highest average) has far less number of candidates as compared to other shifts. In that case we take the next shift with 'highest Average' as base for normalization.

70% of the average attendance is the limit. Any value below this should not be considered for the base.

16. TIE-BREAKING RULE:

Wherever two or more candidates have secured equal aggregate marks, the merit of the candidates shall be determined by applying the following Tie-Breaker Rules in following order of precedence: -

- i. Candidate obtaining higher marks in matriculation or equivalent.
- ii. Candidate senior in age will be ranked higher.
- iii. In case where the ages mentioned in (ii) are same, the merit list would be prepared in alphabetical order of first name of the candidates.

17. OBJECTION MANAGEMENT:

Candidates can view their individual answers/online response (Chosen answer Option and Master answer key) after 3-4 days of conduct of examination, by logging into online portal with their registered credentials. In case of query/objection in respect of any question(s) and its answer, it is to be submitted only through Online Response Link in the portal with documentary evidence within 03 days. The Objections received will be re-examined by the subject expert(s) for its finalization.
